Publication Title:

Portable storage container

Abstract:

Abstract of GB2427606

A portable storage container (10) that both stacks and nests with similar containers includes a plurality of walls extending upwardly from a floor. At least one of the walls includes an inner wall (22) portion and an outer wall (20) portion. At least one of the inner and outer wall portions has an elongated pin opening (30). A pair of bail members (18) are each movable among a nest position, an upper stack position, a middle stack position and a lower stack position. Each bail member includes a support portion (19) and arm (38) extending transversely from outer ends of the support portion. A pin (32) extends transversely from an outer end of each arm. Each pin (32) is received in one of the pin openings (30), with the arm (38) received between the inner and outer wall portions.
